Summary

Programming graduate and Applied CS student with a specialization in .NET. During my internship at Vanden Broele, I gained hands-on experience with .NET 9, Docker, Vue and OpenSearch, building high-performance search systems and multi-tenant architectures. I am a proactive self-learner and have developed an interactive e-portfolio using React and Three.js.

Skills

📄 Programming Languages C#, JS, SQL, Python, TS, Dart	📁 Backend Development MVC, REST APIs, SignalR, OpenSearch	📄 Frontend Development React, Vue 3, HTML5, CSS3	🔗 DevOps & Tools Docker, Linux, Git, Postman, VM	📱 Mobile & Desktop .NET MAUI, Flutter

Experience

Vanden Broele Software Development Intern	Bruges, Belgium Mar 2025 — May 2025
--	--

- Designed a high-performance document search system using OpenSearch, replacing legacy SQL-based queries to improve search speed and scalability.
- Implemented a secure multi-tenant architecture and real-time dashboards with anomaly detection.
- Tech Stack: .NET 9, Vue 3, Tailwind CSS, Docker, OpenSearch.
